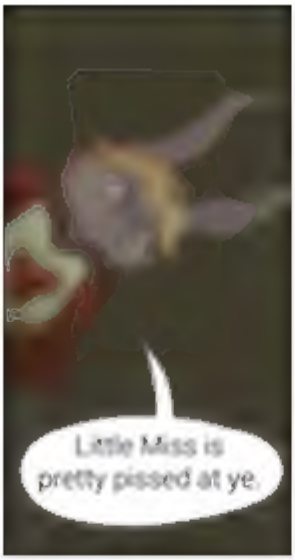
TURN YOU

CH2



Little Miss is pretty pissed at ye.

I am so hungry.
Bringin' a fuckin' werewolf inta our house.

Ow.

Were ye TRYin' t' kill this entire project in one day?
How could ye not have known this woulda happened?
Cuz ye came pretty close!
I'm starving.

How can ye think about food at a time like this?!*
*Turning therianthrope consumes a lot of energy. Burns calories like crazy. One could starve to death.

Now back to our problem--
Can I please eat?

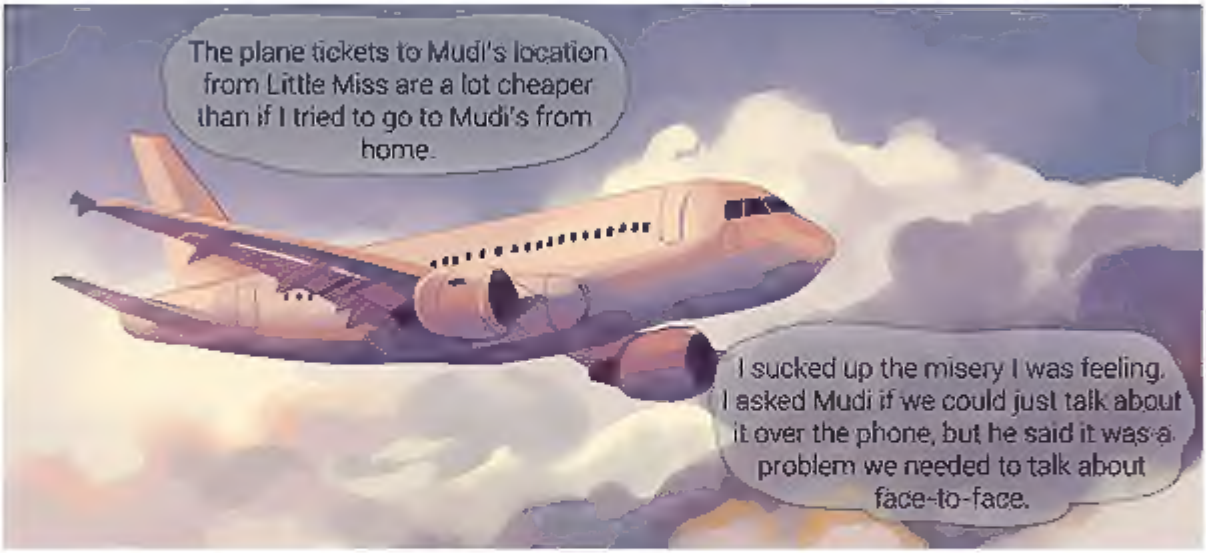
Can I have more food?
Ye know this gonna cost ye, right?
Food ain't that expensive.
HA-HA
Oh nonono. The damage ye caused ta Little Miss's barn? That's gonna cost A LOT.
What damage?
Whaddya mean 'what damage'? Ye destroyed the damn property!
Ye know how much one of those wolves costs? A new sports car. No financial plan. Cash upfront.
Holy shit. But still don't know what you're talking about.
This.
...oh. Did I do that?

Ye brought a werewolf in n' ye turned inta it.
We need t' melt yer suit down.
That thing is a menace t' society n' will kill ye.
Uh, no?
Nothing good comes from a werewolf. The only reason yer still alive is cuz of the healin' abilities.
See these legs?
Fuckin' werewolf took 'em. Körper saved Little Miss, drove the monster off.
If Little Miss wasn't fused, with faster healing capabilities, we may not've survived.
'Fused'?

Little Miss was eaten, but Little Miss IS Little Miss. In flesh, latex, and fur*.
I've got to get the hell out of here.
*Legally they no longer exist.
Korper is slow, cuz she hasn't eaten 'nough humans. She's the closest thing ta yer suit. She kinda knows what yer wantin' her t' do, but she ain't smart 'nough ta talk. Think that's why she was the only one ta come help.
Moni Mudi will be able ta help ye with yer lil werewolf problem.Little Miss refuses to help, though.
Not on werewolves.
Moni Mudi?
He knows MUCH about that topic. Best ta drop in without tellin' him.
Preferably during the full moon.
???
So ye can rip him a new one over this.
Ahehe.
I need to go. Where is my suit?
MONI MUDI
But it's gotta be melted down.
...

Y'all come back now, y'hear?
Nopenope nope.
Oh, and expect a bill at the address left on yer license.

I probably should have called a cab first.
What am I going to do about this?



The plane tickets to Mudi's location from Little Miss are a lot cheaper than if I tried to go to Mudi's from home.
I sucked up the misery I was feeling. I asked Mudi if we could just talk about it over the phone, but he said it was a problem we needed to talk about face-to-face.

MUDI'S HOME
There's... much to cover.
Make yourself comfortable.

This isn't much better than Little Miss's house.
Why do they all like taxidermy?

It changed everything I used to love. The suits that I wear now sense that I'm infected, and they want nothing but to destroy me.

She attacked me as well. Infecting me with loup-garou.

The smell alone drives them wild. The scent of loup-garou instills fear into those who can smell it.

But, if fusing with a suit creates...and being bitten as well...
Why isn't Little Miss a were, uh, rabbit?
I don't know. It appears, just as your suit is the percentage that differs, so too is hers.
I have only met one. So I don't know.
Do you..., y'know..., turn into what-what Zeich turns into?
No, not nearly as aggressive or monstrous.
But I gave Zeich that lou-garou when he bit me. He got infected.
...what?
I'm sorry I never told you. I didn't want someone I didn't know, knowing about that.
You could have spread the news and then I'd be trapped--
--in a room, observed, studied, dissected, like an alien.
Like what happened with my wife.
There is potentially a way to give him a body back, though.
WHAT??
As she harvests animals for their latex pelts, the body is left behind. You could use one of those to grant Zeich his own. After all, that's what happened with Körper.
Körper was skinned, but she had the nasty habit of murdering her owners. Normally suits that violent would be melted down, but Körper was the first to be reunited with a rubber body.
I have no idea why Little Miss would do that.

However, Zeich's lycanthropy is going to cause issues.

My love cannot turn back into a human. She's a permanent werewolf, having been consumed. Will always look like one.

The full moon drives those instincts up the wall and she becomes those horror stories you hear in fiction about werewolves, actively seeking to kill and spread her control as much as possible.

But when I'm there, she seems... different. More like a wolf than a monster. Happier. Like she's not in pain or driven to insanity.

Instead, she's by my side, running and playing and having fun with me like we were teens again. She's more herself when I'm there.

Why are you telling me this?

I'm offering you a solution. It's not a convenient one, but if you want Zeich to be 'free', seeing as he's able to talk like us, and make sure he doesn't hurt anyone else, you must do what I do.

Are you saying like, you can turn into a werewolf too?

Not exactly, but you can, too. Thanks to Zeich infecting you from me.

This is madness.

It's the least I could do for ruining your suit... Little Miss would flat out reject you if YOU alone asked her.

I propose this question to you:

Do you accept the responsibilities of taking care of someone you love, no matter what they look like--

--animal or monster?
「Mudi cannot create new true moon werewolves, but he can grant the gift of shifting into a dog to others by infecting them.
That only applies to non-latex creatures. For latex creatures, if Mudi were to infect them, such as Zeich, the lycanthropy virus--transmitted by a latex werewolf--will fully affect the latex creature into becoming a full latex theriantrope--not just wolves, but *any* latex animal.」

Mudi helped me repair Zelch with spare latex

It hurt significantly less that time.

Perhaps it was because you were with me, to go through it with me.

Thank you for putting me back together.

Tessa blew up my phone in the past few days

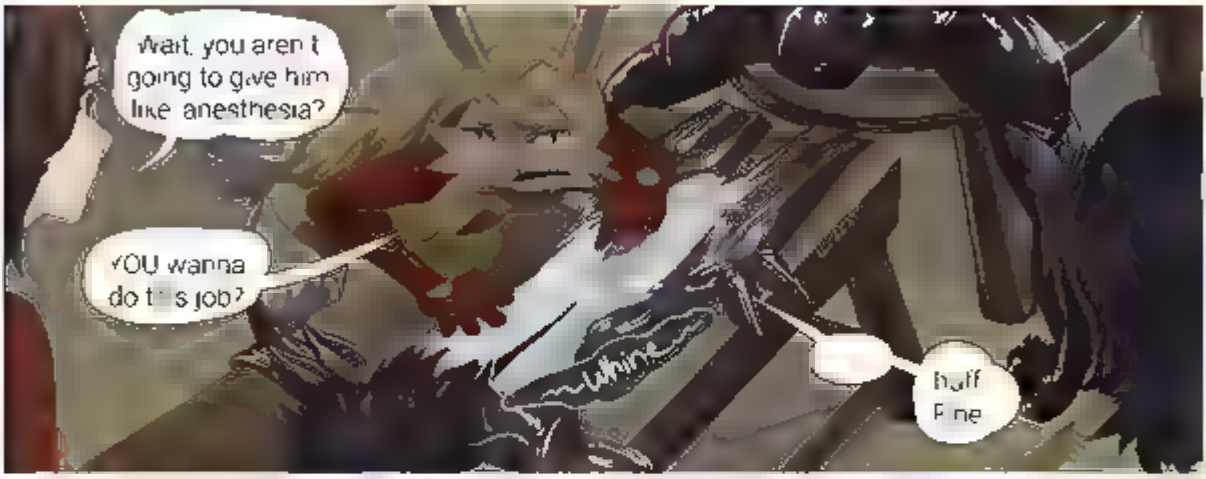
Mudi and I are getting back to Little Miss's on Mudi's dime since this is all his fault

And fear of Little Miss's invoice is all too real.

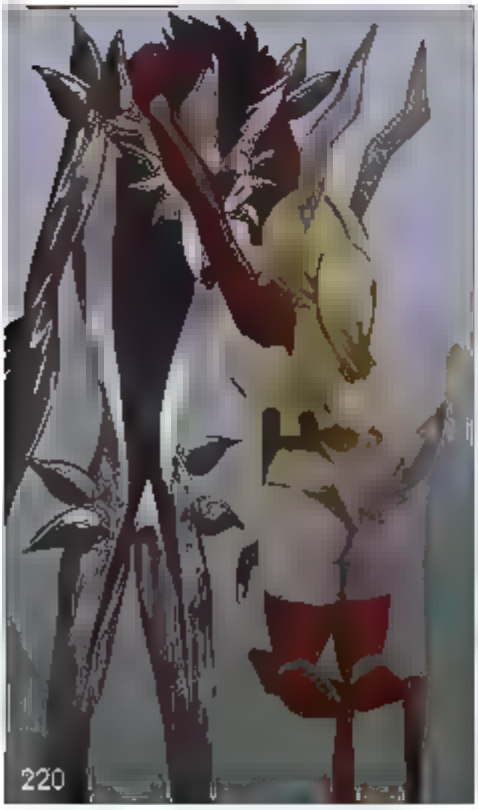
You fused with your suit and turned out fine
I wish for a cure for my wife. If we allow Zeich his own body he can be used for research to create an antidote for her
Right?
Um
Sure
I will put investments in this company otherwise
Let Little Miss just RUIN some poor wolf's day
BEHOLD.
gggGGg
gggg
Wow that even fit him!

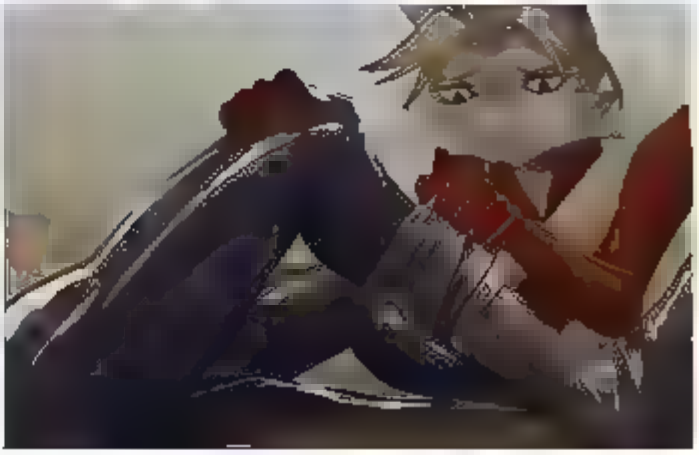
Don t know, don t care! This is the only body yer gettin

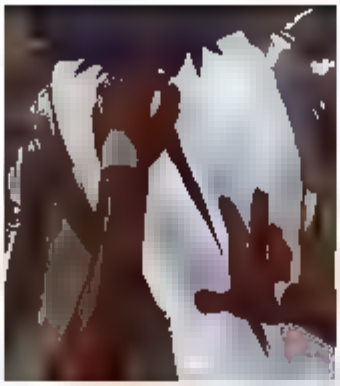
Gonna need ta cut ye in half again

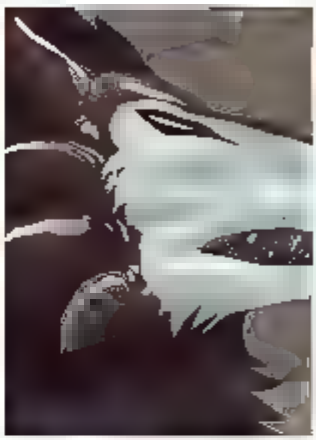


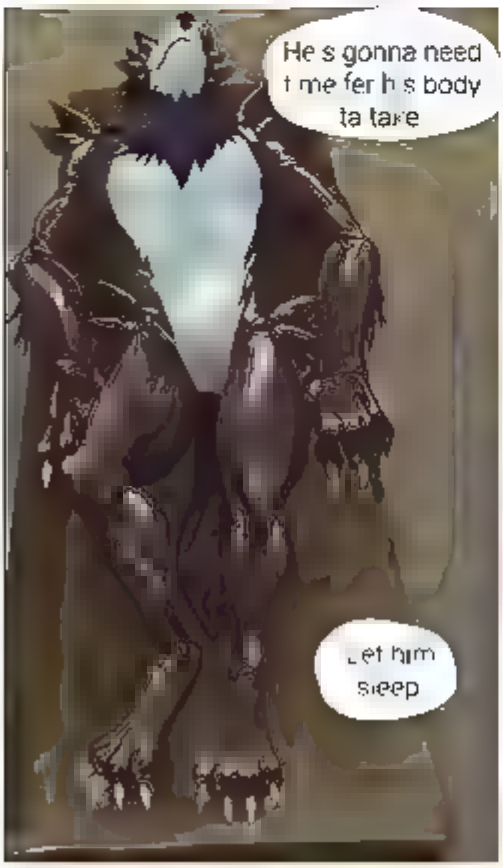
Wait, you aren t going to give him like anesthesia?
YOU wanna do this job?
whine
Half Fine



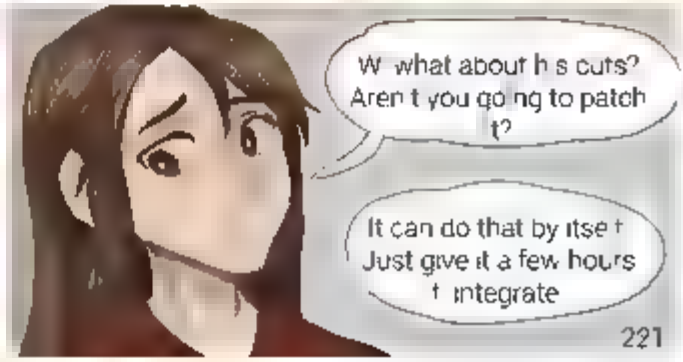






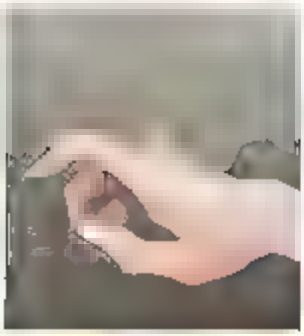


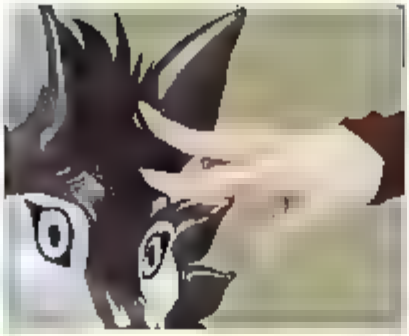
He s gonna need t me fer h s body ta take
Let him sleep

If we didn know any better, Little M ss would say ye were tryinna build yer own werewolf army
Psh


W what about h s cuts? Aren t you going to patch t?
It can do that by itse f Just give it a few hours t integrate

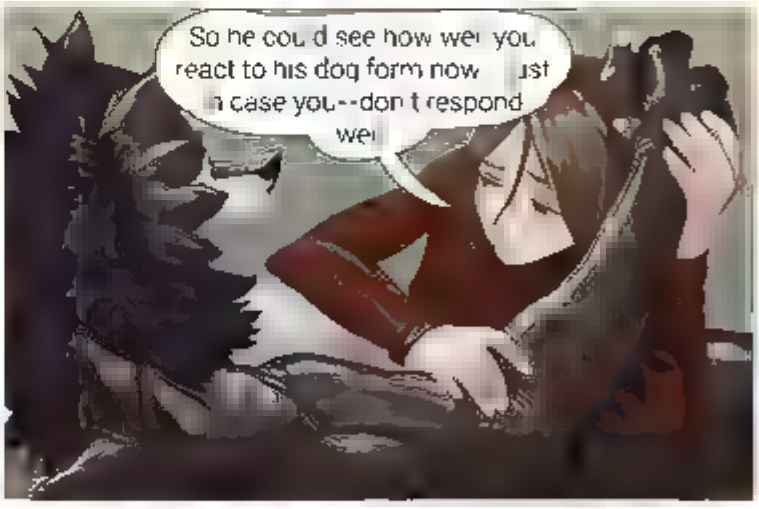
isn't he beautiful?
Elia, we should talk



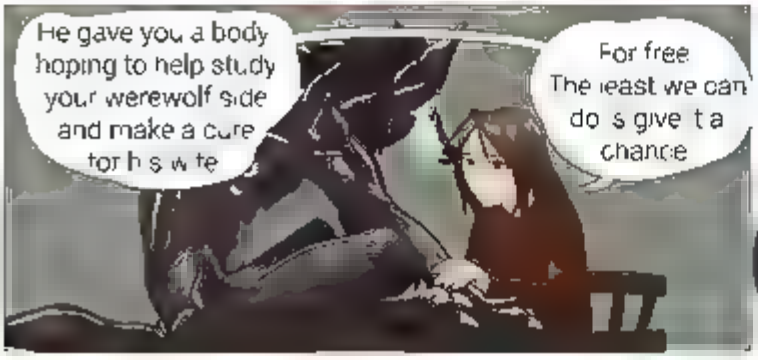


don t know what m doing anymore

Mudi and thought t wou d be better if you stayed with him unt l after the next full moon



So he cou d see how wel you react to his dog form now ust n case you--don t respond wel



He gave you a body hoping to help study your werewolf side and make a cure for h s w fe
For free The least we can do s give t a chance

Why do I have to stay for an entire month?

Mudi said it would take a few weeks to get used to your new body.

And so that I have time to learn how to turn into a dog.

A and I need some time away. This is too much for me to handle.

I need time to think about everything that's gone on.

What with you being able to wa k. Walk and what not.

You don't want me anymore.

No! But. We both need time to figure things out.

Who knows?

Maybe you be happier there.

I don't want to stay. I don't want to be alone.

I want you.

You're hurting me

I was barely squeezing you.

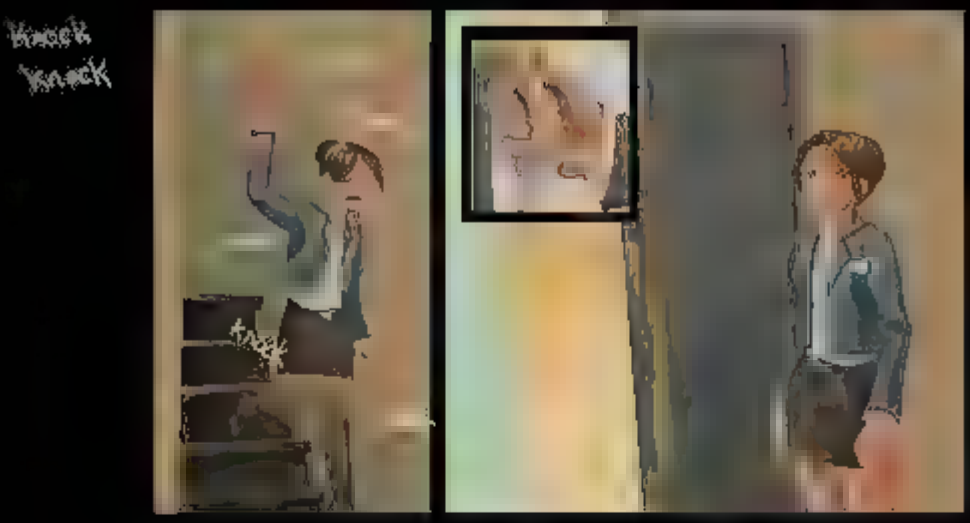
See, that's exactly the kind of thing you need Mud. for. You don't know your own strength.

It's just just a month.

Just one month.

Just one month
Just one month?
Just one mont

2 months later



END
(for now)

Little Miss Explains:

The existence of latex animals in the wild

It's pretty simple.

It's pretty simple.
A disturbingly obsessed scientist basically invented sentient rubber goo. He released it into the wild because he wasn't exactly the most sane person around.

「It's similar to animal activists releasing thousands of minks from a fur farm because they think they're doing the animals a favour when in reality, they're both killing the mink and endangering wildlife.」

The sentient goo began to consume other animals, evolving to take on their forms, whilst spreading to other continents via methods similar to other invasive, non-indigenous species.

As some came across humans, some hybridized into human forms by eating humans and evolving into latex anthros.

For areas that have little human population, you will find many more feral latex animals still.

Little Miss Explains:

Serenity Vauss's Dragon Suit

"If all suits come from natural animals, is Serenity Vauss's dragon suit real too?

Lizard suits can be modified to have wings from bats and horns from animals like ox, but the chance of the addon being rejected is very high. Even higher when you're trying to modify their anatomical structure, like changing a fox's face to look like a cat.

There's a high chance of phantom limb or body dysphoria developing on the suit's end, causing them to maim themselves. There's also a moral quandary here about whether or not you should ever alter an animal like that just for YOUR entertainment, especially for ones that aren't so intelligent and cannot give consent.

'Dragon' is very much sensational lingo for a probably mentally screwed up frankenstein suit who has to be repaired on a constant because it wants to tear itself apart.

Serenity Vauss's suit is no exception.

Little Miss Explains:
